Band 6 (12h actin): images taken on 2020-07-30

Band 5 & 6 in Figure 2D, and Figure 2M used the Abcam (ab85038, 1:1000) anti-TOP1 antibody, which was later replaced by the Invitrogen (PA5-82658, 1:1000) anti-TOP1 antibody due to its wider applications (WB, ICC and IF), and the rest of the TOP1 bands in Figure 2 used the Invitrogen antibody.
