

Table of contents

Appendix Figure S1 : Differential gene expression in MAPL^{-/-} mice

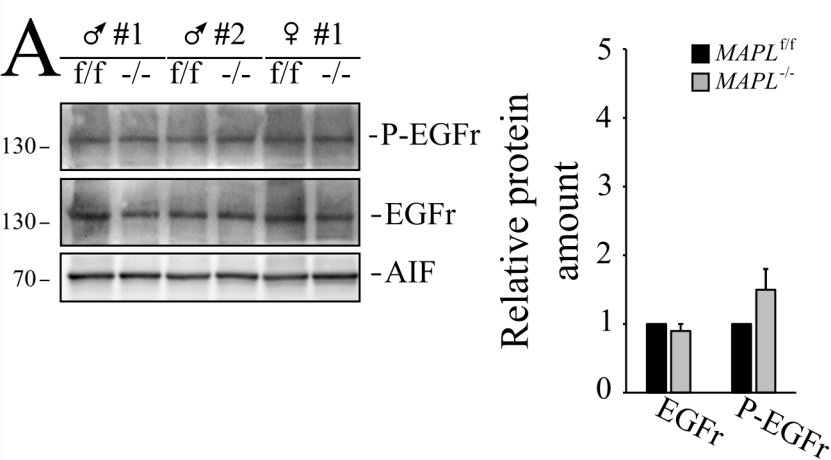

Appendix Figure S2 : EGFR is not dysregulated in livers of MAPL^{-/-} mice

Liver RNAseq dataset

Differential gene expression in MAPL^{-/-} mice

From liver RNAseq (N=5 per sex and genotype). Heat maps of all differentially regulated genes.

EGFR is not dysregulated in livers of MAPL^{-/-} mice

Immunoblot of phospho Tyr1086-EGFR and EGFR from liver protein samples. N=3 biological replicates per genotype. Immunoblot of AIF as a loading control. Right Panel is the quantification of the immunoblots (Error bars represent SEM).
