B

C

Figure S3: Distribution of the PA200, PI31 and PA28 $\alpha\beta$ regulators associated with the standard or the immunoproteasome in the different cell lines. A, B) The fraction of total P20S (PAI normalized by the median PAI of the 20S proteasome non-catalytic subunits) of the PI31 (A) and PA200 (B) regulators were plotted against the β 5 fraction in the different cell lines. C) The fraction of total P20S of the PA28 $\alpha\beta$ regulator were plotted against the β 2i subunit fraction of total P20S in the different cell lines. Data corresponding to the different cell lines were represented on the different graphs.
