

Supplementary Material - Prioritization of Zoonoses for Health Professional Knowledge Building in Canada, Canadian Journal of Public Health

Sensitivity analysis

Table 1 Score matrices assessing degree of impact of each criterion

How many diseases had a rank change between 1-5?		Number of diseases with change in rank (>5 places)		Overall Impact
Intervals	Score	Intervals	Score	
0-5	low	0-2	low	Low
6-10	medium	3-5	medium	Medium
11+	high	6+	high	High

Table 2 Criterion impact based on scores for changes in rank between 1-5 and changes in rank >5 places

1-5 / >5	Low	Medium	High
Low	Low	Low	Medium
Medium	Low	Medium	High
High	Medium	High	High

Table 3 Sensitivity test results by criterion

Criteria	Overall disease with change in rank	Number of diseases with change in rank (1-5 places)	Change in rank by >5 places - Number of diseases	Impact
----------	-------------------------------------	---	--	--------

Incidence	30	26	4	High
Trend	5	3	2	Low
CFR	29	20	9	High
Severity + LTS	27	23	4	High
Treatability	24	19	5	High
Detect + diagnose	26	20	6	High
A-H transmission	24	21	3	High
H-H transmission	31	26	5	High
Preventability	25	21	4	High
Risk perception	24	12	12	High
Current environmental climate	32	20	12	High
